

What's New

Small effort, big rewards

Life insurance policyholders now have something to cheer about. IndiaFirst Life Insurance has introduced its new cashback plan to help customers reap huge rewards with small savings. One can start investing in the IndiaFirst Cash Back Plan for as little as ₹522 a month to savour long-term investment benefits such as children's education and wedding, and their retirement, after paying for a limited period. The plan offers the choice of paying premiums quarterly, half-yearly or annually, with the first cashback option available upon completing three years. The plan also offers a death benefit by paying 10 times the annualised premium along with accumulated guaranteed additions to the nominee. One can also take additional tax benefits on the premium as well as on the benefits they receive at regular intervals or on maturity of the plan.
